Announcement 1142

Attention Provider Type 38: Notification Regarding Claims Denied with Edit Codes 0883 and 0884

Provider type (PT) 38 (Home & Community Based Waiver – Individuals with Intellectual Disabilities and Related Conditions) claims submitted electronically may have been denied inappropriately with edit code 0883 (NPI/API Submitted is Invalid) due to a technical issue during electronic claims processing. The issue was corrected on April 29, 2016. The affected claims that were denied inappropriately have been automatically reprocessed. The results of the reprocessed claims appear on remittance advices dated May 13, 2016.

PT 38 providers who bill with an Atypical Provider Identifier (API) instead of a National Provider Identifier (NPI) are reminded to be sure to bill with a correct and valid API. If you have questions on the validity of your API or if your claims have been denied with edit code 0884 (API not on file), please verify the number with the Provider Enrollment department (877-638-3472) and resubmit your claims with your correct API.
